

Glory GFR-S Series Currency Counters/Discriminators

Specifications

	GFR-S60	GFR-S80	GFR-S80V
Modes	Mixed, (Mixed2), Count, and Denomination Detect (DD)		
Counterfeit detection/ Suspect note detection	None	Dual magnetic sensor	Dual magnetic sensor Dual LED ultra-violet sensor
Count speed	Up to 1,000 notes per minute		
Feed method	Roller friction type		
Hopper capacity	Up to 300 notes		
Reading currency	4 directions		
Stacker capacity	Up to 200 notes		
Reject pocket capacity	Up to 50 notes (20 notes default)		
Display	LED		
Jam clear	3 area open		
Dimension	12.2" (W) x 10.8" (D) x 11.6" (H) 310 x 275 x 295mm		
Weight	26.6 lbs (11kg)		
Option	10-keypad for manual input (only available w/printer) PC I/F RS-232C; I/F to PC terminal via RS-232C Printer I/F RS-232C- Citizen™ IDP-3550 or compatible printer required

GLORY®
QUALITY THE WORLD COUNTS ON

GFR-S Series
Currency Counters/Discriminators

Tank Tough GFR-S Series

Unstoppable! GFR-S Series

The GFR-S Series are the most productive currency counters/discriminators being used today in banks, credit unions, retail cash rooms and casinos. Designed for durability and ruggedness, the GFR-S Series, with tank tough metal construction and innovative reject pocket, are features placing them above all the competition.

Counting mixed denominations up to 1,000 notes per minute, all three GFRs divert suspect notes to a separate reject pocket without interrupting the counting process. Glory

is the first company to make this feature available in a desktop counter/discriminator. Within seconds, the operator is provided the deposit's total value, piece counts, and the value of each denomination processed. Many GFR-S Series users report productivity throughput gains up over 30%, attributing this to superior reliability and the unstoppable feature of the reject pocket.

Reject Pocket

GFR-S60

GFR-S80

GFR-S80V

Three Choices for Better Productivity and Counterfeit Detection

GFR-S60: The essential S60 features the basic functions of the GFR-S Series, including four operating modes—Mixed, Mixed2, Denomination Detect and Count—and an impressive counting speed by all three machines of up to 1,000 notes per minute. They read currency in four directions and have a stacker capacity of 200 notes. All provide easy operation and count reporting by a conveniently positioned LED screen.

GFR-S80: Technology is advanced with the GFR-S80's counterfeit/suspect note detection. Dual magnetic detectors survey each note as it passes through the machine.

GFR-S80V: For increased counterfeit detection, the S80V provides new cutting edge counterfeit/suspect note detection capability with the addition of dual LED ultra-violet sensors. Most suspect notes will not escape this advanced detection technology. The new ultra-violet detection, along with all the other exceptional standard features of this series, provides the industry with an advanced processing solution not found in any other machine.

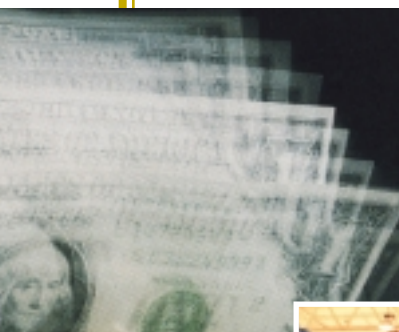

GLORY: Experience the World Counts On

Glory's leadership and experience is an integral part of all our cash handling products. Every one is designed with top priority for rugged construction and durability. A full line of processing solutions, including multi-purpose compact coin sorters, currency sorters, cash dispensers, coin wrappers and coin counters, provide superior performance day-in and day-out for countless loyal customers.

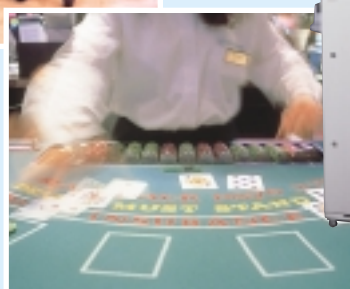

GFR-S Series—In Pursuit of Perfection

Glory products are recognized for their ability to exceed customer expectations. GFR-S60, S80 and S80V offer four operating modes which provide the flexibility needed for the busiest cash rooms.

- 1) **Mixed Mode** - Mixed denomination notes are counted and displayed as total amount.
- 2) **Mixed2 Mode** - Allows two-user count processing and provides independent totals for each user. Counts mixed denomination notes and displays total amount.
- 3) **Denomination Detect Mode** - Automatically sets denomination via first note detection. The GFR-S Series off-sorts unlike notes and continues counting the specified denomination without stopping.
- 4) **Count Mode** - For non-currency processing, provides accurate piece counts when denomination sensor is turned off
